TEST DRIVEN DEVELOPMENT WITH THE MOB

Software development in rational baby steps

Anders Lillleheim

MAKE IT FAIL

A test that fails gives you insight in why it fails
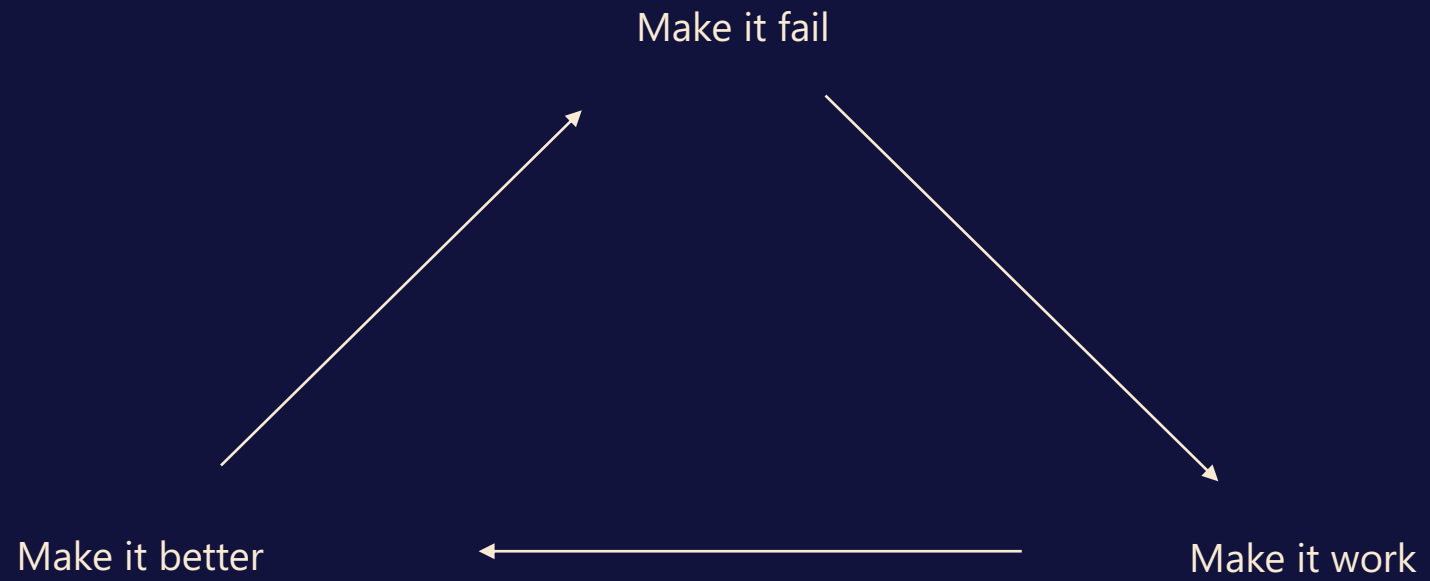

MAKE IT WORK

If the test works your moving in the right direction

MAKE IT BETTER

Refactor

Make it fail

Make it better

Make it work

bouvet

PAIR / MOB-PROGRAMMING

Utilize group knowledge

Design emerges from code

Focus on behavior

bouvet

CONCENSUS

If the group agrees the solution is better

THE BIG "WHY ?"

- You get:
  - code that is documented
  - the code you need.
  - less need for domain knowledge

THE BIGGEST "WHY ?"

You get code you dare to touch

Thank you

Anders Lilleheim
