# How learning TDD improved my workflow

Ole Joar Moi

Before learning TDD

A lot of hair-pulling

Cluttered implementation

- "Everything at once"
- Low readability

A lot of refactoring

- Time consuming
- Low test coverage

After learning TDD

Hair is finally growing back

Thought pattern
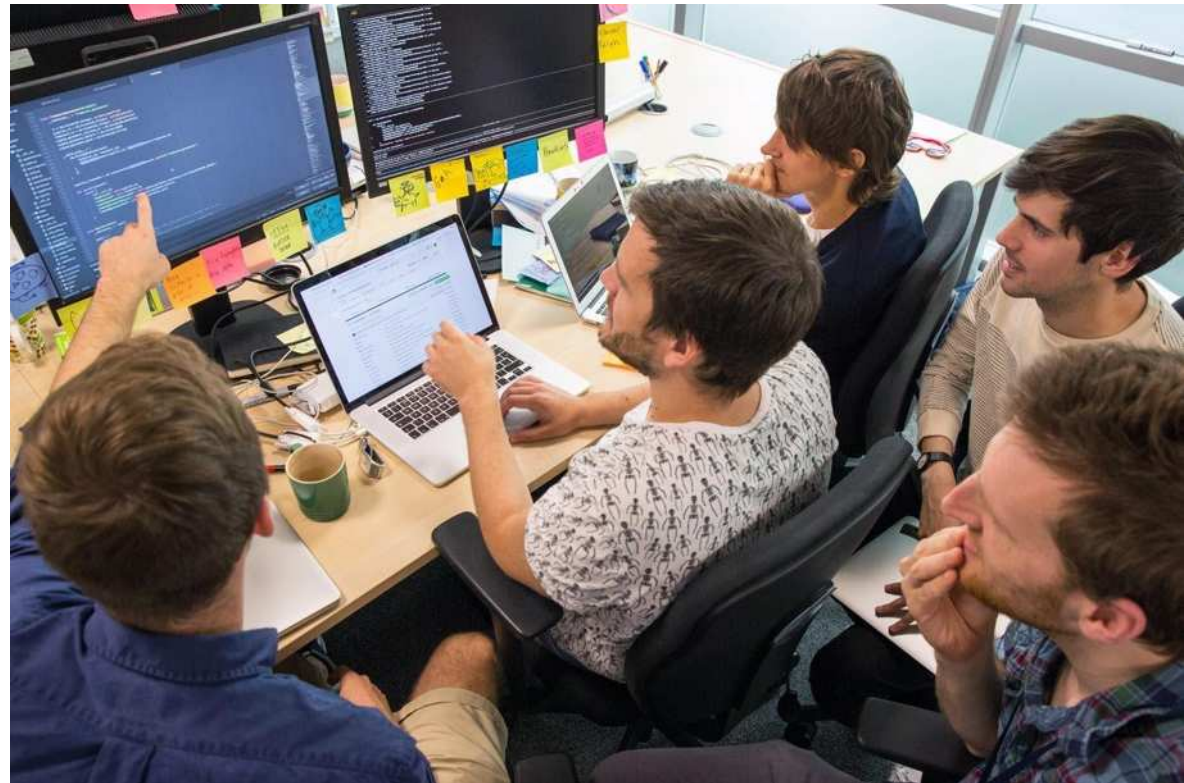

- Looking for behavior
- Working backwards

High quality code

- Structured
- Improved readability

End result

- Motivated

Thank you!
