WISHFUL
THINKING

Learned

No 1:1 for implementation & test class

TPP takeaways: Use lookup tables & don't use global mutable state

Object calisthenics: Wrapping, Tell don't ask & Law of Demeter

Refactor constantly and aggressively

Refactor 80/20

Code smells: Primitive obsession, feature envy, divergent change

Test doubles: Stubs for queries, mocks for commands

Only mock/stub boundaries

Outside-in: Simulate user interaction for ATDD

Lacked

CONCEPT OF
CONNASCENCE

MORE PRACTICING
OF CODE SMELLS
