

# That's not what I meant!

A TALE OF ERROR'S, MISUNDERSTANDING'S AND HOW TO OVERCOME THEM.

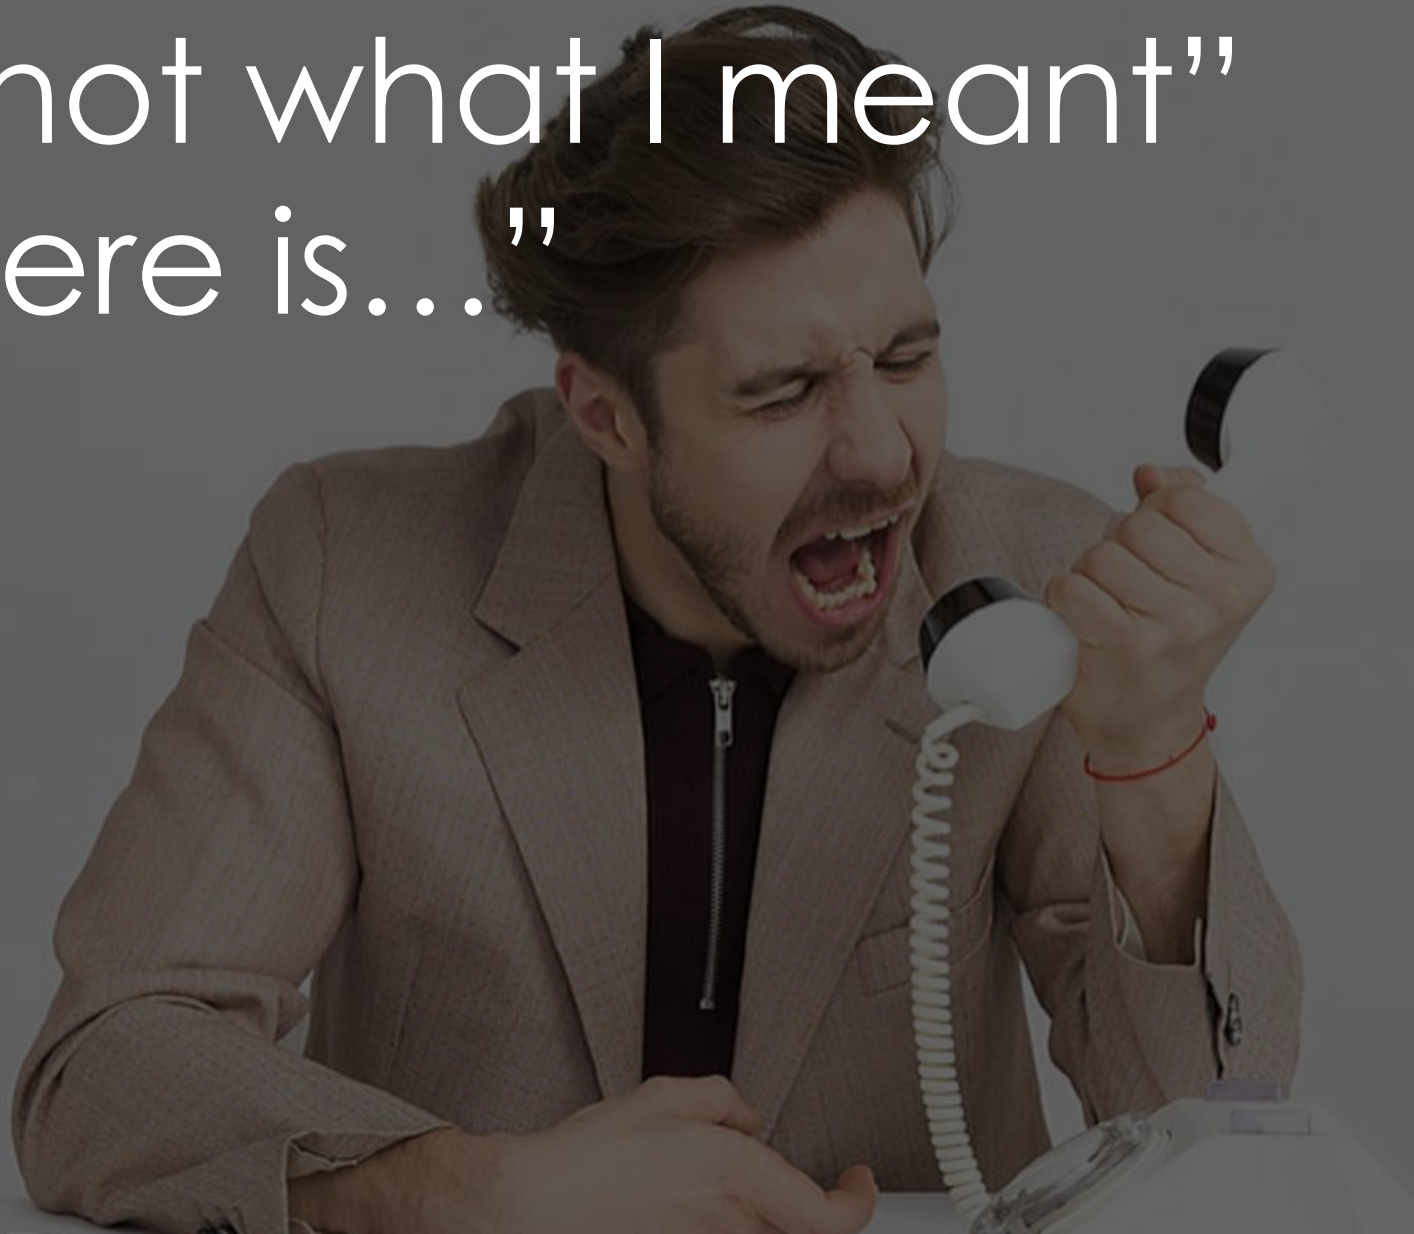

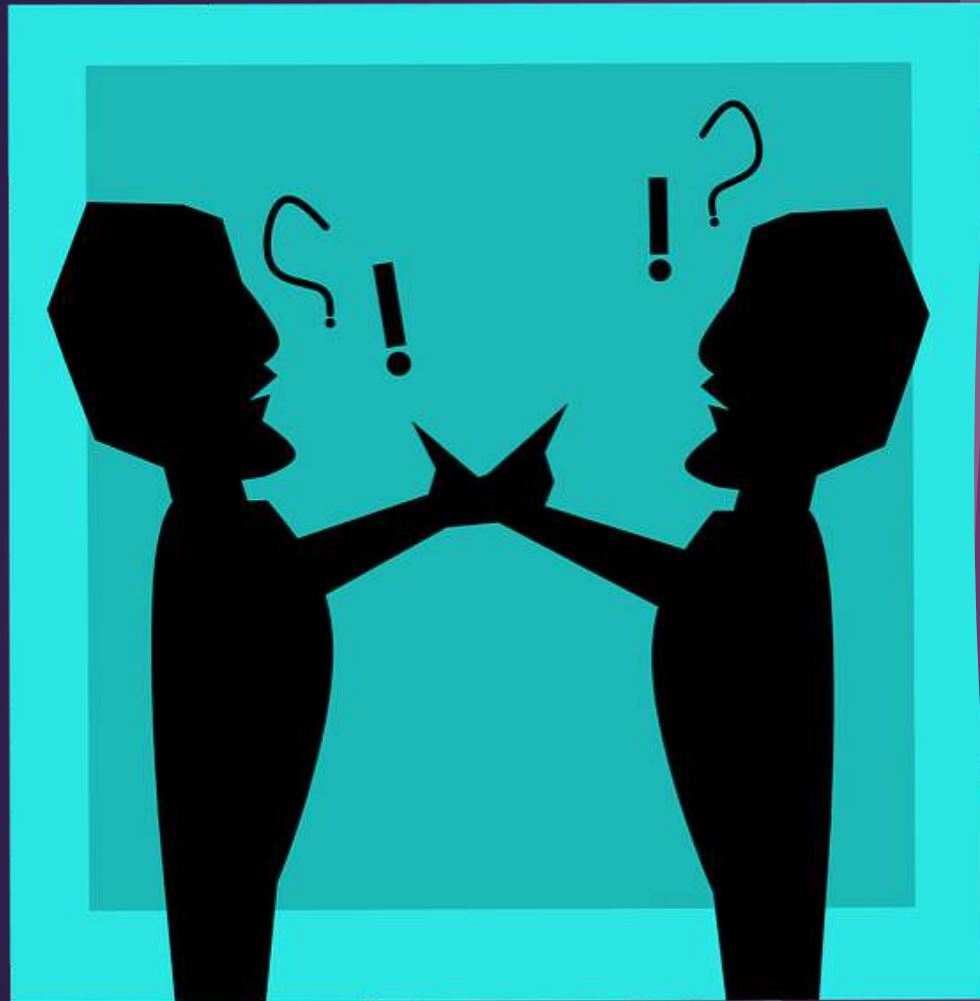

You Finished  
your work. All is  
green and the  
World is fine.

But then:

“That’s not what I meant”

“But where is...”

Incomplete?  
Misunderstanding?

How to fix this?

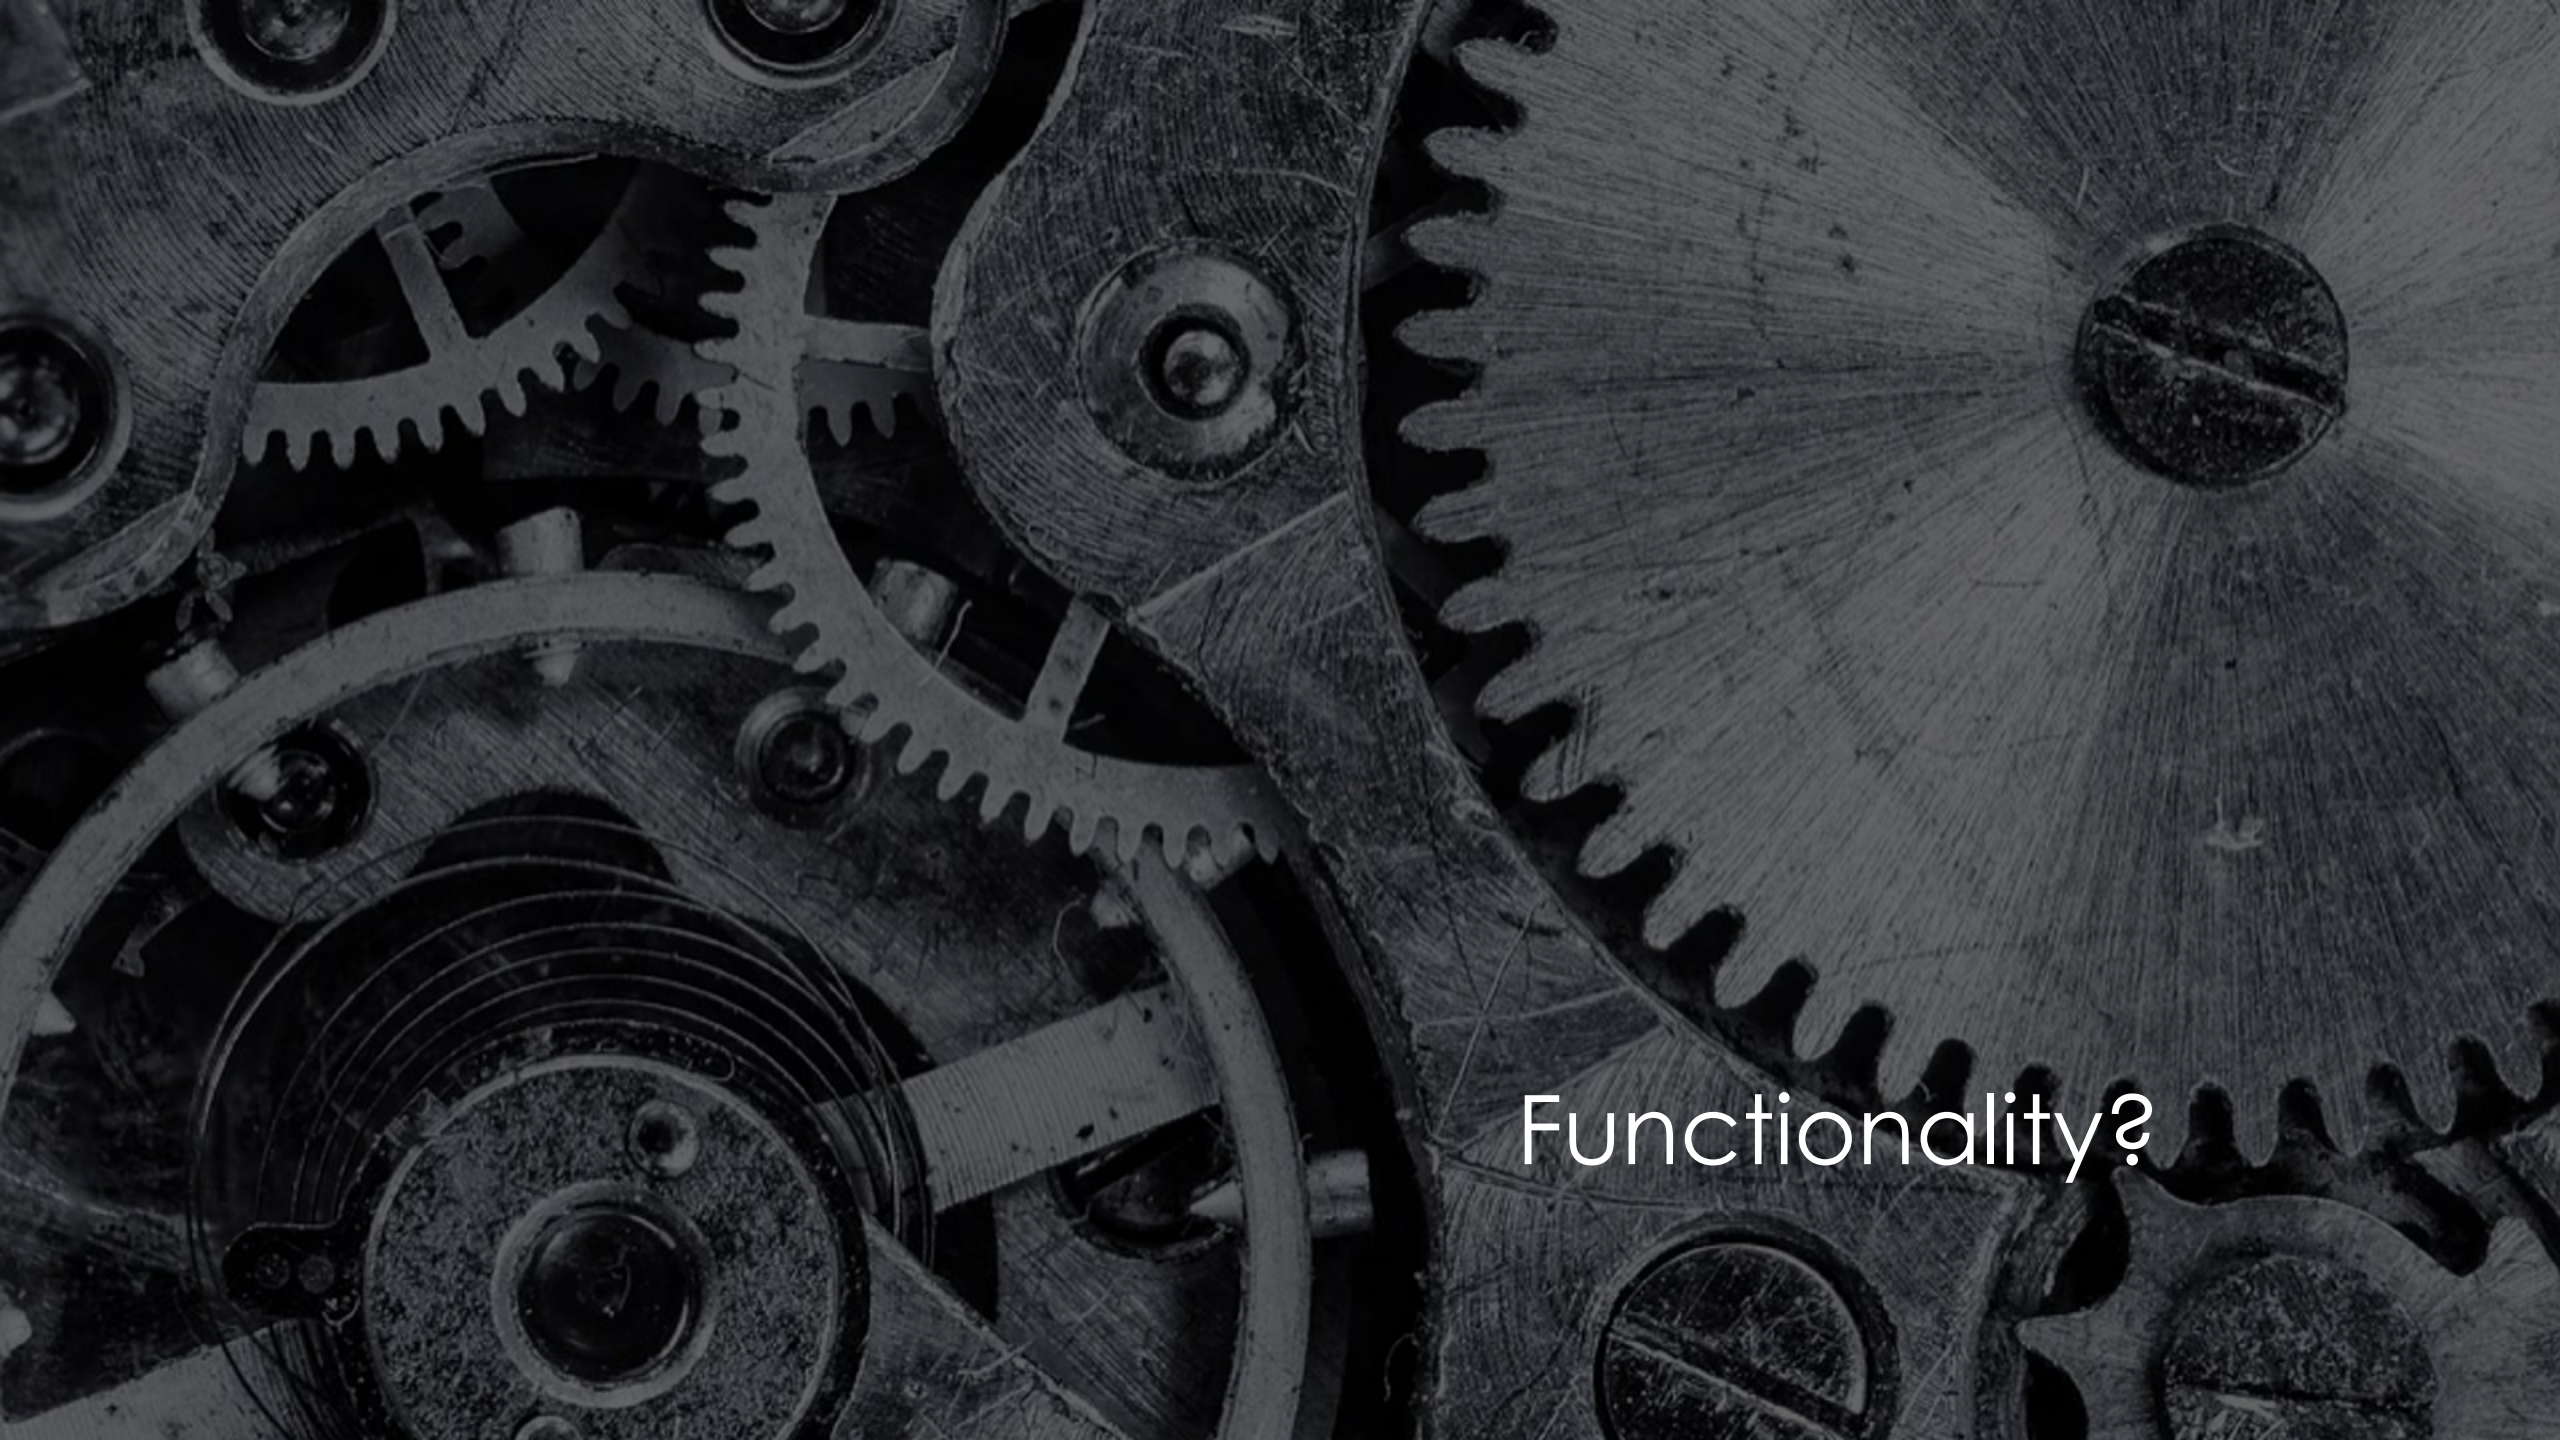

A man dressed as a circus clown is balancing a large barbell on a tightrope. He is wearing a black top hat, a yellow jacket, and red and white striped pants. He has a white beard and a black mustache. The background features a red and white striped curtain and a blue and white striped tent. The word "Mocking" is written in white text on the left side of the image.

Mocking

Only part of the solution.

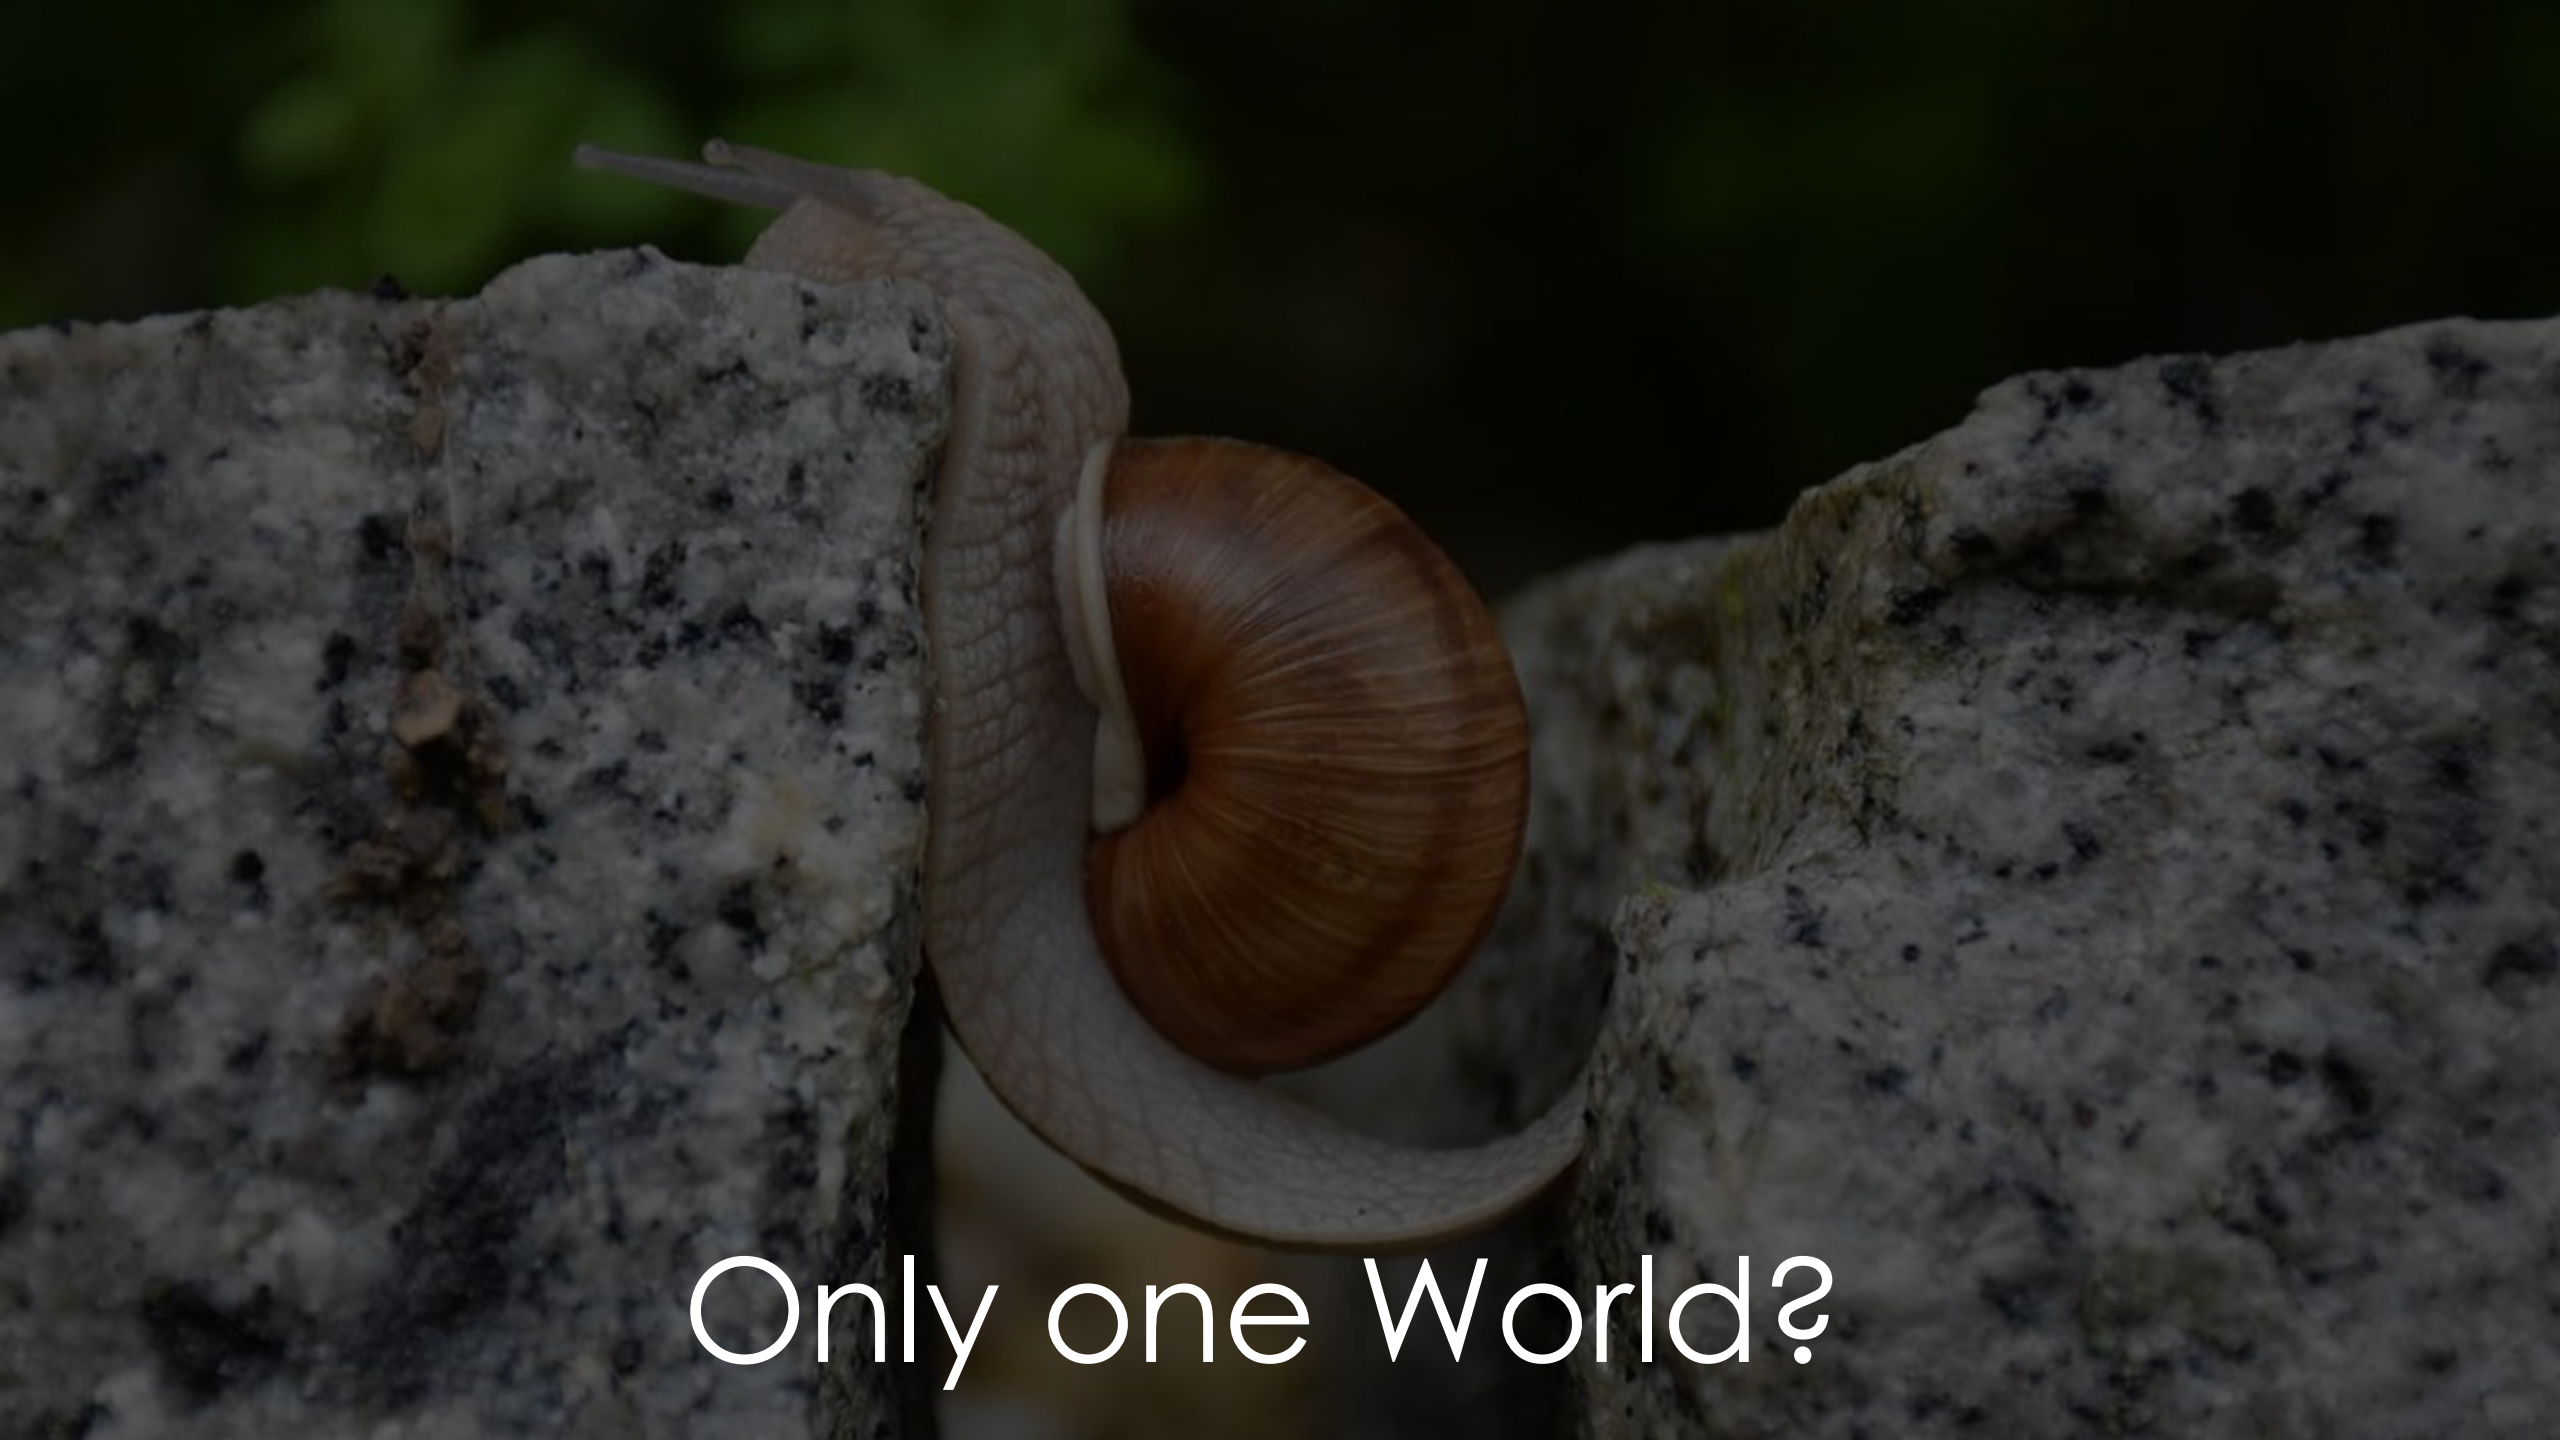

Functionality?

# User Storys

A black and white photograph showing two large, thick stacks of papers, likely user stories, arranged in a row. The papers are slightly disorganized, with some edges visible. Several small, light-colored labels are attached to the stacks. The left stack has a label at the top that reads "1994. 11" and another near the bottom that reads "1992 (11)". The right stack has a label at the top that reads "2012 (11)", a label in the middle that reads "2003 (11)", a label below that that reads "2002 (11)", and a label at the bottom right that reads "2001 (11)". The text "User Storys" is overlaid in white on the left side of the image.

Only one World?

# Acceptance Tests in JUnit

@Test

public void printPortfolioCriteria() {

// given

iBoughtShares(OLD\_SCHOOL\_WATERFALL\_SOFTWARE\_LTD, amountOfShare: 1000, LocalDate.of( year: 1990, month: 2, dayOfMo

iBoughtShares(CRAFTER\_MASTERS\_LIMITED, amountOfShare: 400, LocalDate.of( year: 2016, month: 6, dayOfMonth: 9));

iBoughtShares(XP\_PRACTITIONERS\_INCORPORATED, amountOfShare: 700, LocalDate.of( year: 2018, month: 12, dayOfMonth: 10

iSoldShares(OLD\_SCHOOL\_WATERFALL\_SOFTWARE\_LTD, amountOfShare: 500, LocalDate.of( year: 2018, month: 12, dayOfMonth:

currentShareValueOf(OLD\_SCHOOL\_WATERFALL\_SOFTWARE\_LTD, BigDecimal.valueOf(5.75));

currentShareValueOf(CRAFTER\_MASTERS\_LIMITED, BigDecimal.valueOf(17.25));

currentShareValueOf(XP\_PRACTITIONERS\_INCORPORATED, BigDecimal.valueOf(25.55));

// when

printPortfolio();

// then

String expectedOutput =

"company | shares | current price | current value | last operation\n" +

"Old School Waterfall Software LTD | 500 | \$5.75 | \$2,875.00 | sold 500 on 11/12/2018\n" +

"Crafter Masters Limited | 400 | \$17.25 | \$6,900.00 | bought 400 on 09/06/2016\n" +

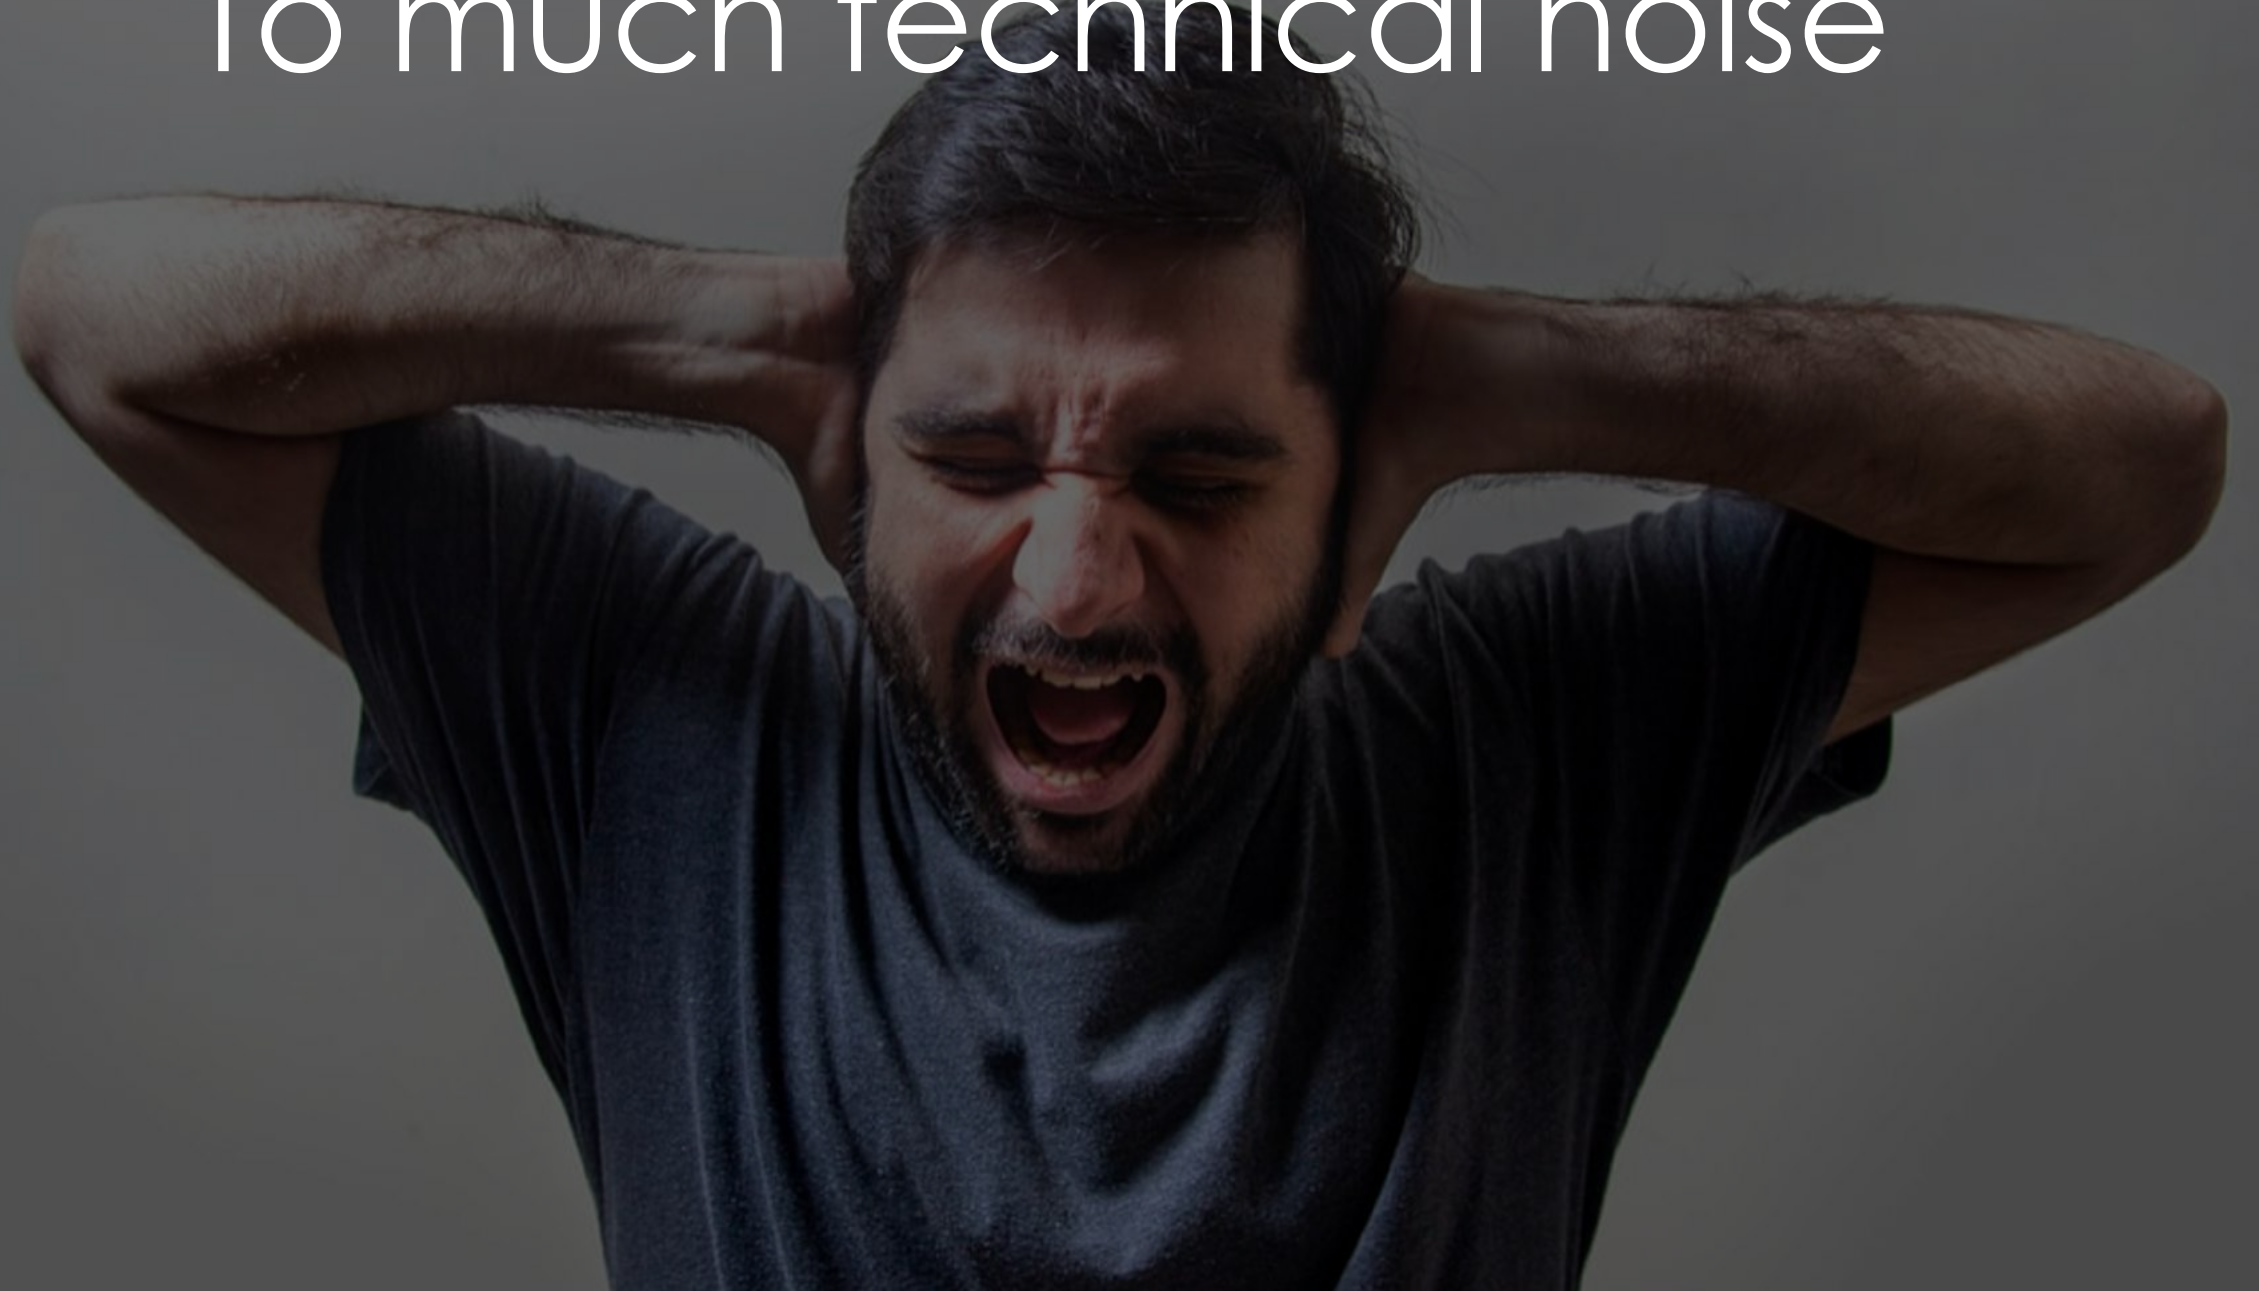

"XP Practitioners Incorporated | 700 | \$25.55 | \$17,885.00 | bought 700 on 10/12/2018";

outputShouldBe(expectedOutput);

}

To much technical noise

The solution:  
Cucumber

Let's get our Hands dirty!

Solution to all our  
Problems?

Bridge the world's
