

Error culture

We are humans after all

F. Yankelevich

Please note: Chaos ≠ Error Culture

IT is a complex world!

Digitalization requires a mind-shift

Frequent technology turn-around

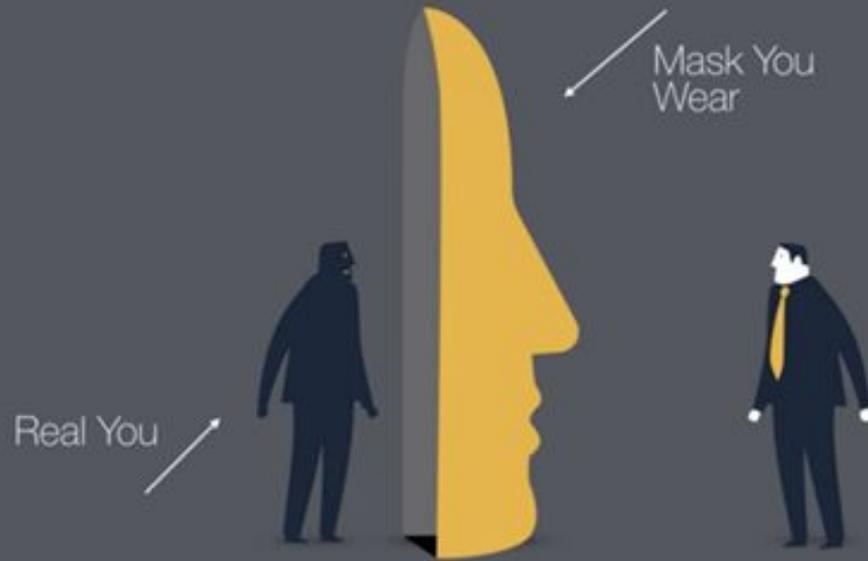

Fast moving industry

The original sin

Impostor Syndrome

Sometimes we do mistakes

No-Action might also be an error

Recognize your mistakes

Speak about them

Act professionally

We all

make

mitakes!

It's just a matter of responsibility

What is Error Culture

source: <https://www.teamazing.com/what-is-error-culture/>

Mistakes are allowed

Search for solutions

Concession

Feedback

It's a company-wide effort

Responsible workers drive the future of a company

Inspired by the book "Drive" written by Daniel H. Pink

There are 2 types of motivation:

Type X behavior is driven by **extrinsic** desires - money, power, .

Type I behavior is driven by **intrinsic** desires – autonomy, mastery, and purpose.

It is normal to start a "Type X" and then you become a "Type I" person.

Quality is expected, don't wait customers to ask for it.

Take decisions all together: good and bad ones.

Be committed!

YES, WE CAN!
